## 2002: La iniciativa de Budapest (Budapest Open Access Initiative)

By “open access” to this literature, we mean its **free** availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, **crawl them for indexing, pass them as data to software**, or use them for any other lawful purpose, without financial, legal, or technical barriers.

## 2002: La iniciativa de Budapest (Budapest Open Access Initiative)

By “open access” to this literature, we mean its **free** availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, **crawl them for indexing, pass them as data to software**, or use them for any other lawful purpose, without financial, legal, or technical barriers.

To achieve open access to scholarly journal literature, we recommend two complementary strategies.

1. Self-Archiving
2. Open-access journals

## Acceso Abierto: una oportunidad perdida

*“Green OA has no promise of delivering augmented revenues to the publisher, but **Gold OA opens up a new customer**, the author him or herself, who in many instances pays for the article to be OA. **Gold OA**, in other words, represents a **business opportunity**, whereas **Green OA** represents a **business problem**.”*

Joseph Esposito, Publishing consultant

## 2012: The Finch report, por encargo del gobierno británico

### Recommendations:

1. a clear policy direction should be set towards support for publication in open access or hybrid journals, funded by APCs, as **the main vehicle** for the publication of research, especially when it is publicly funded.

### Key actions:

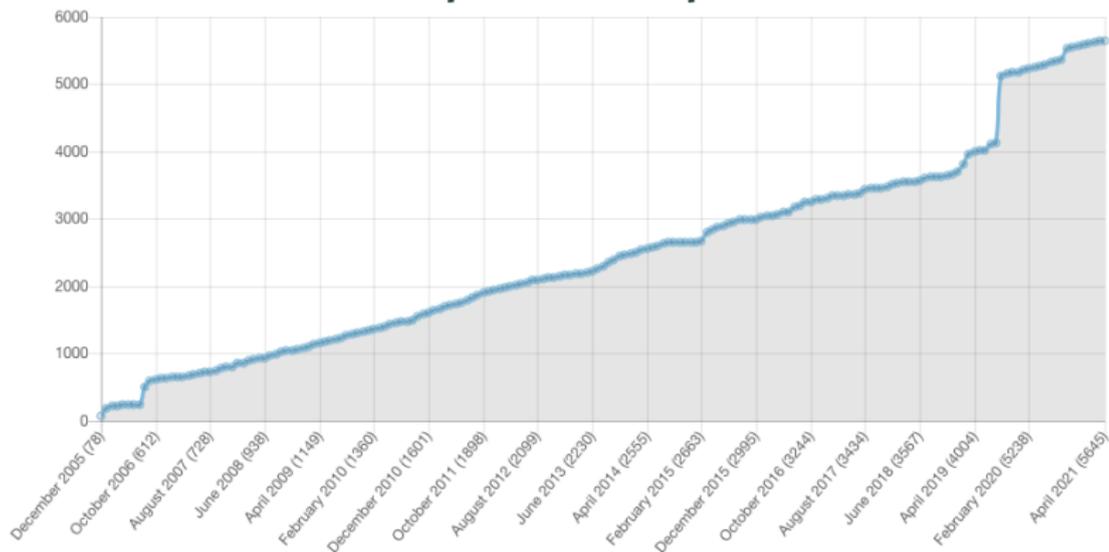

1. Make a clear commitment to **support the costs** of an innovative and sustainable research communications system, with a **clear preference for publication in open access or hybrid journals**.

Pubfair**Issue Date:** 5-Feb-2020**Abstract:** Presentation delivered in a COAR meeting to investigate the potential for a common, distributed architecture that would connect peer review with resources in repositories. The aim of the meeting, hosted by Inria in Paris, France, past January 23-24, was to share the current workflows of various projects and systems that are managing or developing overlay peer review on a variety of different repository types (institutional, preprint, data, etc.), and assess whether there is sufficient interest in defining a set of common protocols and vocabularies that would allow interoperability across different systems. This presentation gave an overview of one of these ongoing initiatives.**URI:** <http://hdl.handle.net/10261/199795>**DOI:** <http://dx.doi.org/10.20350/digitalCSIC/13486>

## Editorial introduction

[Read article at ArXiv](#)

Gabor orthogonal bases and convexity, *Discrete Analysis* 2018:19, 11 pp.

A fundamental way of understanding a function  $f$  defined on  $\mathbb{R}^d$  is to expand it in terms of a basis with nice properties. Typically, one assumes that  $f \in L_2(\mathbb{R}^d)$ , and then it becomes natural to look for orthonormal bases with properties such as interesting symmetries. For example, wavelet bases, which play a very important role in signal processing, are orthonormal and consist of translates and dilates of a single function.

## Editorial introduction

[Read article at CSIC](#)

The proliferation of fake news in internet requires understanding which factors modulate their credibility and take actions to limit their impact. A number of recent studies have shown an effect of the foreign language when making decisions: reading in a foreign language engages a more rational, analytic mode of thinking (Costa et al., 2014, Cognition). This analytic mode of processing may lead to a decrease in the credibility of fake news. Here we conducted two experiments to examine whether fake news stories presented to university students were more credible in the native language than in a foreign language. Bayesian analyses in both experiments offered support for the hypothesis that the credibility of fake news is not modulated by language. Critically, Experiment 2 also showed a strong direct relationship between credibility and negative emotionality regardless of language. This pattern suggests that the driving force behind the engagement in an automatic thinking mode when reading fake news is

# Formulario de revisión 1

## Name \*

First name(s) + "Jr"

Last name

## Affiliation \*

## Scientific standards \*

Choose option 1 if you consider that the work is scientifically acceptable. Choose option 0 if you consider that the authors should revise the work taking into account your evaluation. The scientific standards refers to various relevant parameters such as methodology, clarity of presentation, use of language, inclusion of key references, soundness, etc.

# Formulario de revisión 2

## Importance of this work for its academic field \*

Rate in a scale from 0-100 the importance of this work for its academic field.

## General interest \*

Rate in a scale from 0-100 how interesting this work is for other academic fields.

## Social value \*

Rate in a scale from 0-100 the importance of this work for society in general (e.g., how relevant this work is for the problems society is currently facing).

## Overall quality assessment \*

Rate in a scale from 0-100 the article globally.

## Upload your review as a single pdf file \*

# Conclusiones

- Conflicto de intereses entre el negocio editorial y la ciencia
- Las revistas pueden publicarse en repositorios institucionales
- El control de los procesos de validación, evaluación y diseminación nos permitirá adecuarlos a los intereses de la ciencia y la sociedad
- Psicológica será la primera revista *overlay* de una sociedad científica publicada sobre un repositorio institucional
